General Information These three clerestory windows are all on the same side facing toward the old Church, with only about a 12 foot space between them and the Church, so they will have a modified light.

They would like to keep these in decorative pattern, elaborate, similar to the side chancel lancets, with decorative symbols. Suggested the 12 Apostles - or take a series of Christian symbols from Stafford - pick a series of Christian symbols, and send them to them for consideration.

They like lots of detail - they like red. The committee woman knows the Hill School, Pottstown windows, thinks they are wonderful - that is the sort of thing they want.
