General Information Note: Mr. Boni to have \$500 commissions from this amount. This above price is for the principal side windows, with harmonious glass in the three front (cast) windows.

Chancel window now in sheet. 3692.
See other side.

Father Constant likes red. Make all the backgrounds red.

We have studied the story of the
of Saint Anthony's Church, Manchester,
for which Mr. Bond has so kindly shared with us.

We feel that its distinguished design lends
itself beautifully to simple and colorful enrichment
in a rather unusual manner.

We have studied the problem in a rough color
sketch for one typical window, and are sending it
to you herewith.

We believe that this general plan and character
of design can be carried out in the principal side
windows, with harmonious glass in the three front
(east) windows, for eighteen thousand (\$18,000) dollars.

We should be happy to undertake these windows
that basis.
