Footage... 16 1/2 feet in one panel.

Inscription... "In memory of Frank Rogers"

See Contract

Design wanted... Design made

Staging.....

Templates.....

Blueprints.....

General Information... Isaac... See design that has been made

Note: Scaffolding has been arranged for the other panel by Dr. Galloway - erected by George D Crews, 310 Lincoln Av. Lutherville, Md. Tel. VALley 3-3451 - outside staging, ladder inside.

IMPORTANT: When we make this panel, arrange to make the Abraham panel somewhat smaller. We can do this by substituting the smaller figure in the central panel without changing the surrounding glass. The best time to do this will be when the Isaac panel is made so we can develop them together. To be same size as the figures of Christ and John Baptist

(Note: The full size drawings for the completed Abraham window in place, are ready with the smaller figure of Abraham - scale the figure of Isaac with it, so that they in turn will scale with the first pair of figures.)
