General Information Calvary theme. They like the Rye Beach window. Subject to be designed much like the Rye Beach - simple field - no foliated pattern. (Remember there are to be structural changes in the window openings).

The subjects for all the windows would be designed in medallions, one to a window, set in comparatively simple fields, much like our windows in Ontonagon, Michigan.

We have prepared color sketches for typical windows,-
first the Baptistry with the Calvary theme, - Mary the
Mother and Saint John the Evangelist at either side,
in full color in a field of very light tinted glass
surrounded by a colorful border.

Criticism of design:"...The Vestry asks that you change the leg position of Jesus on
the Cross.I have never seen the legs crossed..." (Be sure to just overlap the feet).

Note changes: Have less pink.in the background.
