Templates Blueprints

General Information There are two of these, but make typical design.

These are in three sections, divided by 5/8" metal tees. The upper and lower sections are 11 5/16" high, and the middle section 11 11/16" high. Frames are of metal, and the glass set from outside. Probably 1/4" rebate.

These are to be very simple windows - to feature the names of dead priests. There are six so far. They want to provide for as many as forty or fifty eventually. Have them on plates, - perhaps three on a plate now, and the rest in ornament to be replaced from time to time.

*Price: \$225 each, as designed; Then, "designing and changing the name plates which might include three in most cases, and two for others, might amount to \$60 each plate. I am basing this on about \$30 for our part of the work and \$30 for the installation, and I suppose either might run a little higher. We shall be glad to do them at cost." 1/5/59.

80
225 each
plates of 3 - 30
50-60

We have been studying the design for the two narthex windows at Saint Anne's, and are sending you a rough sketch of what we have in mind for them. It was quite a problem, but I think we have devised a practical plan that should work out well.

At the top we have indicated two scrolls with room for the names of six Priests. The foliated patterns below, in gold and silver, would be planned for replacement with similar scrolls from time to time.

We have indicated a text from the Mass for all Holy Souls as a border pattern.
