Architect

Vents REMOVE the ventilator.

Position in Church group of three side panels, one window   Center group
we should devise some

Height from floor 2   Protection Glass kind of protection glass   Groove Rabbet   Metal Stone Wood

Exposure West   Footage 26 ft.

Inscription "Gift of Mr. and Mrs. Charles W. Gibbs"

Design wanted before end of June   Staging

Templates   Blueprints

General Information   Center panel, The Good Shepherd, very much like that in Saint Gabriel's, Marion, including the church.
Simple backgrounds in the side panels, somewhat in harmony with the big window, with sheep in each.

Mrs. Gibbs would like the light blue in her window replaced with dark blue, cobalt, as it is at the top of the central panel. (now changed in the sketch).

Please note:
Mrs. Gibbs returned her sketch with the correct coloring. —July 7, 1964.

June 29,1964

Re: Cliftondale, Massachusetts
United Church of Christ

Miss Pearl Belonga came to the studio
and brought both sketches, executed contracts,
and checks in first payment.

Mrs.Gibbs would like the light blue in
her window replaced with dark blue, cobalt, as it is
at the top of the central panel.

We are to remove the ventilator.

Send the sketch to here again, -

Mrs.Charles W. Gibbs
% Ben Clow
Hampstead, New Hampshire

****

The sketch for the window over the entrance
is all right, except they would like to have the Christ
figure a little larger.

****

Miss Belonga said she would find out if
there is a ladder at the church, or available near by
from which we can take templets of the window over
the entrance. She was to write us about this.
