Design wanted before end of June Staging

Templates Blueprints

General Information They want design for the big window (Over entrance) with Christ Knocking in the center panel, like the one in Manito Presbyterian Church, Spokane, but with a red robe, as in Aberdeen.

Background somethine like Manito. Keep fields simple.

Have symbols of the Four Evangelists in the side panels, two in each, not prominent.

Please note:

They would like to have the Christ figure somewhat larger, - perhaps by bringing the feet a little lower, and the head a little higher.
