General Information Father Pitkin, 6/22/'65;

I have decided that the only way in which it would be possible to eventually install stained glass in both windows is to provide for four separate memorials, one each for the four panes of glass that are there now. Instead of using figures, I would want to use symbols, probably of St. Joseph on one side, St. Mary on the other. You suggested the possibility of St. Mary and Saint John. This suggestion has certain merit and I wonder if you would be so kind as to make sketches and send them to me of four such windows --- also a quotation on the price for each of the four.
