General Information..... RECREATION and INDUSTRY.....

Following the suggestions, one celebrates the products of the land with forestry-lumbering suggested by the trees at the top, bordering the cleared and cultivated areas of farming. A bison is indicated near the forest (on your State flag). Below are various aspects of ranching, - cattle and sheep, hay and corn.

A window is devoted to nature's abundance in recreation and sports, with mountains as a background with two small skiing figures. Old Faithful stands for the parks, a bucking bronko for the rodeo, water skiing, the snowmobile and the giant trout.

If you wish, significant texts from the Psalms could be designed in the bases, - perhaps "O Lord, establish Thou the work of our hands", for the first, and "The earth is the Lord's, and the fullness thereof", for the second.
