General Information Blessed Virgin Mary

At the feet of the Blessed Virgin Mary is the
crescent Moon. The crown and stars symbolize the Queen of Heaven.
Beside Her is the mystic rose, while the border is enriched with the
lily motif.

As long as we have started a series of windows, I
wonder if the border ought not to be the same as the Altar window
already installed, and the two new windows at the West end.

The borders could be different in each window, related
to the accompanying figure.
