General Information "Angel"

(Similar to the Fra Angelico angel)

The walls of the narthex as well as the interior of the sanctuary are a l ight warm yellowish beige; the windows are outlined with simulated gray stones; the ceiling of the sanctuary is a deep turquoise and the carpet an antique red. The ceiling of the narthex is white, the woodwork walnut and the carpet gives an overall effect of red similar to that in the sanctuary. I would estimate the size of the narthex at about 15' x 15'.

****

Few suggested changes by donor:

1. Lower the central figure slightly.
2. Which would permit the positioning of the head and horn more like that on the post card; and a bell on the horn like that on the card.
3. Also, a more youthful face similar to those in the vestibule windows of the Union Congregational Church, Ashland, Maine.
