General Information..... Christ Blessing Little Children

Our Lord stands at the center holding a small child in His arms, while ~~two others~~, a lamb with his toys, and a girl with flowers near by.

(Have the girls' dress a little shorter. Perhaps it will be best to have her dress even above the knee. We can give it a more girlish character**in the full size working drawing).

The windows are designed to harmonize with yours now in place and would beautifully enhance and complement them, while enriching the church most effectively. They could readily be moved at any time if the church were changed or extended.
