Design wanted..... Staging.....

Templates..... Blueprints.....

General Information..... Bishop White, and the Circle above.

..... Bishop White holds a model of Grace Church, Philadelphia.

..... The Circuit Rider is symbolized in the Circle above.....

In 1935 Mr. Connick wrote to the Minister there then, -"My point of view in relation to this sketch incorporating William White, Phillips Brooks and a symbolic figure of the circuit rider, is that it symbolizes the American scene and the American preacher and prophet.

As a glass man I like these two figures because they offer an excellent opportunity to characterize in his own terms of design and color-without attempting actual portraiture, the significance of these two spiritual leaders".
